Zavarovalniška metodologija se razlikuje od metodologije izračunavanja demografske statistike. Ker so tablice DAV 1994R že starejšega datuma, za primerjavo objavljamo še Tablice umrljivosti, z doslej najnovjšimi objavljenimi podatki za Slovenijo za leto 2007.

The methodology of the insurance industry differs from that of the calculation of demographic statistics. However, since the DAV 1994R mortality table is no longer entirely up-to-date, a 2007 life table with the most recent data for Slovenia is shown for comparison.
